-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1742

1. The Examiner has carefully considered Applicant's Response of 8/1/05.

At this time, the Examiner makes a new rejection which is accordingly not made final.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kenney et al. in view of Dorfman et al. '392 (Dorfman et al.). Kenney et al. discloses the invention substantially as claimed. Kenney et al. discloses a method of forming a W-Cu composite comprising:

Art Unit: 1742

pressing a W-Cu starting oxide material;
forming a W-Cu composite by co-reduction of a starting oxide material;
sintering the formed W-Cu composite; and
infiltrating the sintered composite with additional copper to form a W-Cu composite.

Kenney et al. states that the powder is mixed, but does not disclose milling the powder.

Dorfman et al. teaches that milling can be performed on mixed copper oxide and tungsten oxide powders in the same field of endeavor to control the particle size of the powders. It would have been obvious to one having ordinary skill in the art at the time of the invention to use milling as the mixing step of Kenney et al. in order to produce a powder mixture of controlled particle size.

Kenney et al. discloses compositional and processing temperatures that overlap Applicant's claimed ranges.

It would have been obvious to one having ordinary skill in the art to select any portion of the range, including the claimed range, from the broader range disclosed in the prior art, because the prior art finds that the entire disclosed range has a suitability utility. Overlapping ranges have been held to be a prima facie case of obviousness, see MPEP 2144.05.
